

# A Measuring Guide for Chains

## A. The Perfect Match: Sizing with Your Existing Chain

1. Select a chain that perfectly matches your style.
2. Lay it straight on a clean, flat surface.
3. Carefully place a ruler alongside the chain.
4. Measure its full length with precision.
5. Note down this perfect size for reference.

## B. The Aigiri Experience: Our String Method

1. Take a piece of soft string or ribbon. Wrap it around your neck to where you'd like the chain to rest.
2. Mark the spot where the ends meet. Measure the marked string with a ruler.
3. Think about how long you want it with your pendant.
